

MOTIF-DESCRIPTION

Especially the Rauhfels and the Geiersteine offer spectacular motifs on autumn days with a little ground fog. The typical weathered Palatinate sandstone characterises the landscape in this area, and other dreamlike photo motifs, such as the Falkenburg, can be found in this region.

DIRECTIONS AND LOCATION

Coming from Wilgartswiesen, take the first road on the right in Spirkelbach (Felsenstraße). At the end of this road, where the asphalt road also ends, is a small car park. Opposite the car park, a path begins that later turns into a trail and leads quite steeply up to the Rauhfels. It is about 650 m from the car park to the plateau of the Rauhfels.

PROFESSIONAL TIPS

May, September; 6 pm - 8 pm

Clouds with sun spots

16-35 mm, 28 mm

Polarising filter and grey gradient soft GND 16

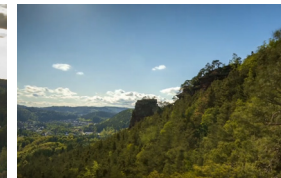

Tripod: Yes

Passing the Rauhfels on the right, a root path leads to a rock plateau, it is about 3 m lower than the highest rock point - view to the east, south and also into the sunset to the west.
